Louisiania and it appears that the simmer and fall will witness the greatest activity ever known in the instory of the oil business.

The chances for success were rever better nor the opportunity for getting into the oil game more intiting. The new development in the district between Okanidsce and the Cushing field is far enough slong to warrant a tremendous drilling campaign and the beat of all the fields are plainly outlined by creeks and creekology is much less expensive than geology. It is an easy game to play.

The new men who are here are rottled to recognition as many of them are oil men or long experience and will add greatly to the business strength of the community. It is to meet these men and to give them the glad hand and to assure them all an appreciation of their presence here and the "get together get acquainted" meeting which is scheduled for Thursday pext is to be held.

In Sunday's World there will be a list given of many new comers who should take a praminent pair in the meeting and names and the companies operating here will be included.

Anyone knowing of strangers who well in su how in the season shut in it is well as been the southwest of 22-14-11 is casing at 3,027 feet.

FONCA CITY. May 6.—There is ecosiderable excitement in the Burbank district of western Osage county because of an oil well just drilled in by the Kay County Gas company, one of the tests on the 350,000-acre gas leaves secured on the western Osage by E. W. Marland. The well has been shut in it is understood, awaiting connection with the pipe line. Six more locations have been made by the company and three additional rigs are being built. The

Anyone knowing of strangers who should be invited personally will please phone this desk, the num-ber is Osage 6241.

Tulsa Concern Heads Linuisiana List

SHREVEPORT, LA., May 7.— One of the most remarkable wells completed in the Homer district, near here, in many months was brought in by the Gladys Bell comtended to provide, if possible, a suf-ficient natural gas supply for Black-well and that territory. It is also announced that the deal whereby levy and associates of New York are to take over the holdings in northwestern Kay county of the Flackwell Oil & Gas company is still brought in by the Gladys Bell company this week when the Featherstone No. L. originally brought in as a 135 barrel producer spouted at the rate of 2,000 barrels. When it first came in two months ago the well, which was an extension northeast of the proven pool, was down to a depth of about 1,142 feet. It was then drilled to 1,275 feet where the 2,000 barrel pay was struck. Another well which is being closely watched is the Gulf Refining company's West No. 7, an offset to the Gladys Bell well. This was tested dry at 1,274 feet. It has now been drilled to a depth of 2,754 feet, a new depth in this fied. The

new been drilled to a depth of 2.754 feet, a new depth in this fied. The showing indicates strongly that a new pay said has been found as there is no record of any well having been drilled to this depth. The well will be brought in within the next few days. Both the Featherstone and West properties are in section 2e-Ei-7.

New Development in Florence, Kansas

The Empire das & Fuel Co. has spudded three new wells in the Florence field, being Allison No. 1 n the southeast corner of 18-21-4 the Pladgett No. 1 in the southwest corner of 22-21-4 and Latrop No. 2. siTrese wells wil be watched with considerable interest.

In Lincoln County

The Strond Oil & Gas Co. has completed a rig and contracted for a well in the southwest corner of 21.
